HAPPY LAN Monitoring Window

Color LCD Touch Screen Control Panel

7" Newly Designed color LCD touch screen control panel makes operability easier and faster.

A stylus is equipped as standard, and USB mouse for PC Can be used.
10.4" screen is also available as option for better visibility and operability.

Front LED Light

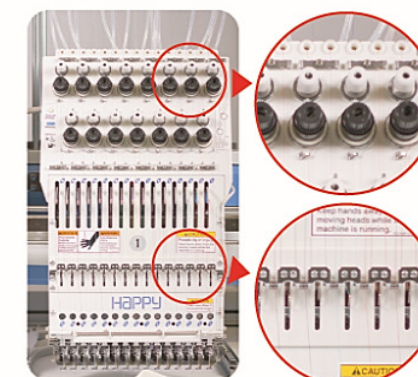

A bright LED light illuminates the work area bright.

Narrow Cylinder Arm

Reducing dimension of cylinder arm improves ability to embroider on difficult area, like pocket, sleeve, legs, children's wear ...

Thread Control System

The thread break sensor and the thread tension control unit are combined which gives more stability to the upper thread control.

The independent thread take-up spring improves the quality of sewing.
